Database Spotlight

American Institute of Aeronautics and Astronautics (AIAA) is the premier provider of information on aerospace technology, engineering, and science. Titles document the most important developments and the latest research in air and space history. AIAA’s publications make the exchange of technical knowledge and information possible among aerospace professionals.

Publications: AIAA has earned an international reputation as the preeminent publisher of cutting-edge aerospace journals and books, and as the leading source of aerospace industry archives, dating back to the early 1900s. Over the past eight decades, AIAA and its predecessor organizations have published over 300 books and almost 200,000 technical articles. AIAA’s current publications include eight technical journals, a magazine, three book series, national and international standards documents, a growing number of e-books and other electronic products, and a full-service, interactive website. For the most authoritative technical publications, look to AIAA.

Aerospace America: A selection of aerospace titles.

Journals—Repository of aerospace innovation.

Meeting Papers—Cutting-edge aerospace research.

Other Publications—Aerospace news digest.

Standards—Best Practices guiding the aerospace community.
