September Focus: Multi-Domain Operations

"...Quantum advances in technology and the realities of fiscal constraints are driving a dynamic era of evolutionary adaptation. This evolution must be deliberately shaped to ensure that domain interdependence does not inadvertently risk a single point of failure. More than ever before, Airmen must have a clear and common understanding of simultaneous maneuver in multiple domains beyond air, space, and cyberspace."  
Dr. Jeffrey M. Reilly

AU LIBRARY SNACK & LEARN SERIES
Learn in a casual environment! We’ll provide light snacks.

Professional Communications  Wed Sep 11  3:00-4:00
